No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Sequence 26, Sequence 26, Sequence 25, Sequence 13, Sequence 21, Sequence 1, A Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequence 61, Sequ

Email: cgapbs-remail.nih.gov
Tissue Procurement: Dr. Stefan Hansson
cDNA Library Preparation: Michael J. Brownstein (NHGRI) with help
and advice from Piero Carninoi (RIKEN)
cDNA Library Arrayed by: The I.M.A.G.E. Consortium (LLNL)
DNA Sequencing by: Agencourt Bioscience Corporation
Clone distribution: MGC clone distribution information can be
found through the I.M.A.G.E. Consortium/LLNL at:
http://mage.llnl.gov
Plate: NDAM991 row: e column: 05
High quality sequence start: 68
High quality sequence stop: 256.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           263
                                                                                                                                                                                                                                                                                                                                                       excertthroctic malazian parasites does not require host cells '(J Exp Med. (2003)197(8):1045-50). mRNA was extracted using the Invitrogen microFAST TRACK kit and used for cDNA construction via the BDBiosciences SWART CDNA synthesis kit. Double stranded cDNA was cloned into plasmid vector using Invitrogen's TOPO TA vector cloning
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Plasmodium yoelii yoelii

17X sporozoites were isolated from salivary glands of
infected Anospheles stephensi mosquitoes and purified over
a DE52 cellulose column. The sporozoites were cultured for
24h at 37C in the presence of 5% CO2 and 10% FBS as
described in Transformation of sporozoites into early
exocrythrocytic malaria parasites does not require host
cells (T Exp Med (2003)197(8):1045-50). mRNA was
extracted using the Invitrogen microPAST TRACK kit and
used for cDNA construction via the BDBiosciences SMART
cDNA synthesis kit. Double stranded cDNA was cloned into a
plasmid vector using Invitrogen's TOPO TA vector cloning
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           GSS 06-FEB-1999

```

Pred. No. is the number of results predicted by chance to have a

score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
